

Hello and thank you for downloading the free After Effects Template Flip Text

Be sure to check out more high quality After Effects project file templates and free stuff on

www.aedude.com

This project is really easy constructed for a basic customization, just follow these three easy steps:

STEP 01

Here you have to decide which background colour the clip should have. Choose one of the existing or create a new solid with your own color.

STEP 02

Here you'll write your own text. Keep in mind that there are only 14 character available. Just one Character per layer... I think you've got it, right!? ;-)

STEP 03

The main composition is composed in HDTV 1080, but if you need HDTV720 or NTSC or PAL you can render the compositions in the folder "other Formats". Decide for a format and render that composition, that's all!

Thanks again!
