Hello and thank you for downloading the FREE After Effects project!

Every layer/folder you CAN customize is marked GREEN, the others are marked RED to prevent errors in the final rendered clip. Just work with the green marked layer/folder for a basic customization.

Change the text by double-click on the specific text pre-comp in the project window. You can change the font or colour, there are no limitations.

Don't forget to check out our other great After Effects templates on www.AEdude.com where you can find great video tutorials too.

Thanks again!

AEdude Support Team
